About Bangladesh Market

The local dairy industry in Bangladesh currently supplies around 65% of the national milk demand, which amounts to 15.2 million metric tons annually. Beyond dairy, the country's food commodity production is projected to grow at an average rate of 8.5% per year between 2020 and 2025, reflecting strong prospects for self-sufficiency and sustainable growth in the agro-food sector. Bangladesh's agro-processing industry, valued at USD 5.12 billion, is supported by a domestic agricultural market worth USD 47.54 billion. The country exports approximately 700 agro and processed products worth nearly USD 2 billion, with exports growing at a CAGR of 18% in recent years. In FY 2022–2023, the sector earned USD 1.04 billion from exports to 152 countries. Looking ahead, the market is projected to expand to USD 19.01 billion by 2027, at a CAGR of 9.1%, driven by rising domestic demand, processed snack exports, and international opportunities. Government initiatives, including PTA/FTA negotiations with 26 countries and trade partnerships with Japan, Nepal, Sri Lanka, and Indonesia, further strengthen export potential. Meanwhile, the overall Bangladesh food market, valued at USD 135.9 billion in 2023, is expected to grow at 9.72% annually, positioning the country as one of the most promising investment destinations in Asia's agro-processing landscape.
